PRELIMINARY AMENDMENT

After assigning a serial number and filing date to the U.S. national stage application based on the above-identified international application, but before calculating the total fee due for the filing of the application, please amend the application as follows:

In the Claims:

Please cancel claims 1-48 and replace them with the following new claims.

49 (New). An electrical connector for electrically interconnecting terminals on a flexible circuit member with terminals on a second circuit member, the electrical connector comprising:

a housing having a plurality of through holes extending between a first surface and a second surface, each of the through holes defining a central axis;

a plurality of elongated electrical contact members positioned in at least a portion of the through holes and oriented along the central axes, the electrical contact members having first ends extending above the first surface adapted to couple electrically with the terminals on the
